

# LABPACKER

## WASTE CONTAINERS

How many lab pack containers can you carry with one hand?

Carry dozens of lab pack containers on to the job easily with Questar's newest fiberboard lab pack container. Easy to deploy. The LabPackers allow you to manage your labpacking needs more efficiently while reducing your container costs.

Each LabPacker comes knocked down with a liner. Open, add liner and begin filling. After filling, each container stacks for easy shipping. No pallet is required. 5 convenient sizes are available.

Each container is UN 4G rated for Packing Group II & III hazardous materials. In addition, the 5 gallon, 10 gallon and 55 gallon LabPackers are rated for Packing Group I materials.

DOT Exemption #13937 permits these containers to be used for lab packing.

Pricing is available, call your Questar sales representative.
